# Telstra Enterprise Mobile Protect
Powered by Wandera

Increased productivity, Decreased risk

# The risks lurking outside the enterprise perimeter

## Device Misconfigurations

**28**%

of organisations don't enforce operating system upgrades

Poor device security hygiene puts apps & user data at risk

## Network Eavesdropping

**81**%

of workers use public Wi-Fi, even if it is prohibited

Business data can be exposed by network-based protocol attacks

## Phishing Attacks & Risky Downloads

**90**%

of data breaches begin with a phish

Phishing is the #1 mobile threat

# Telstra Enterprise Mobile Protect
Powered by Wandera

## What is it?

Telstra Enterprise Mobile Protect is powered by Wandera and specifically designed for iOS devices on Telstra's mobile network.

Telstra Enterprise Mobile Protect combines the power of the iOS platform with the additional security of Wandera, designed to help keep employees personal and corporate information secure while also delivering a best-in-class user experience, allowing workers to focus on being productive.

**We've bundled Wandera Mobile Threat Defence & Wandera Content Filtering licences** to give our iOS customer's protection against the most comprehensive set of external threats, reliable access to business applications, delivered with a first-class user experience.
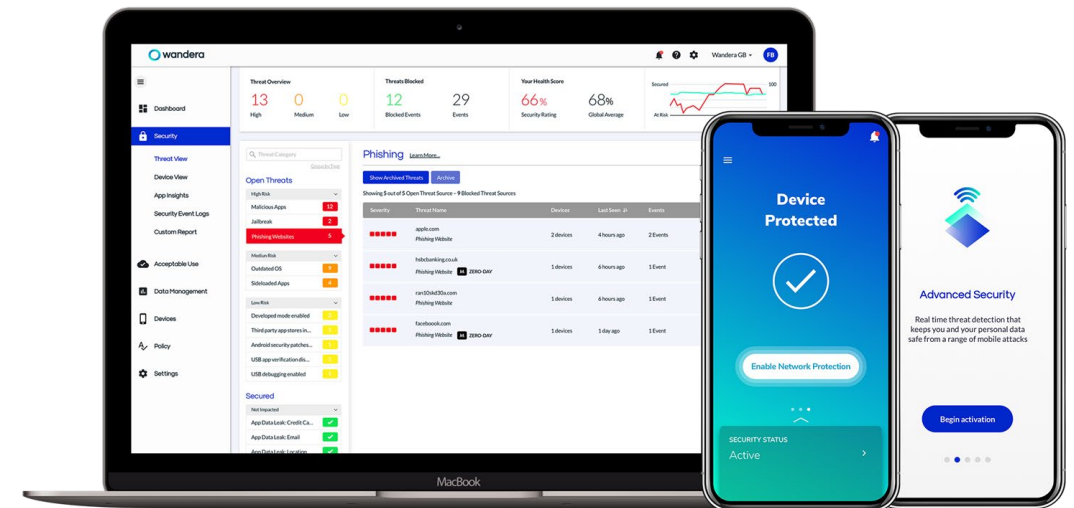

# Securing remote work requires a layered approach

## iOS is the most secure platform

**Wandera detects misconfigurations**

- Ensures OS is up to date and passcode is active
- Monitors for risky profiles
- Checks for unsafe apps

## Defend the Network

**Wandera protects application data**

- Scans wi-fi hotspots
- Prevents connection interception
- Secures sensitive data transfers

## Prevent Usage Risks

**Wandera blocks risky content**

- Blocks zero-day phishing
- Protects and filters web browsing
- Stops sensitive data leaks

Telstra Enterprise Mobile Protect

# Comprehensive security built for iOS

**On-device Defense**

### Wandera App

- Managed devices: Automated deployment
- Unmanaged devices: Self-enrolment via SSO
- Real-time alerts
- Consumer friendly design

**In-Network Protection**

### Wandera Security Cloud

- Real-time threat prevention
- Threat intelligence with leading efficacy
- Enhanced privacy protection
- Flexible tech stack with integration support

# Powered by MI:RIAM Advanced Threat Intelligence Engine
